WINTER 2010

Automatics

PREMATIC the newest division of PREFIT is a supplier and stockist of **Assa Abloy Entre-Matic Automatic Door Range.**

Entre-Matic products have earned a reputation for durability, ease of installation and a cost effective solution for Door Automation.

The systems are designed to give a low maintenance requirement, yet high operational output and therefore can be used in virtually any application.

The Entre-Matic/Prematic products are available in Slide, Swing and low energy models.

We offer both a supply only (off the shelf) or a supply and install service. Equally Prematic are qualified to provide a Maintenance and Service contract to ensure peace of mind in the event of mechanical breakdown for all Automatic Doors.

For more information visit: <http://www.prematic.co.uk>
Please contact Mr Paul Kelly at Prefit

Planet Seals

PREFIT are pleased to be a UK distributor and stockist for the PLANET range of Drop Down Seals for glass doors.

The seal is held within the minimal 45mm rail profile and is activated when the door closes and a concealed button on the internal edge of the rail profile compresses against the frame, releasing the seal to the floor.

When the door is opened the spring tensioned button releases from the frame allowing the seal to retract completely back into the rail, and is not visible

The seal can cover a maximum gap of 16mm, and can be used on an uneven surface to ensure a weather tight seal.

To see the 3 options visit: <http://www.prefit-fittings.com/planet.html>

Please contact our Sales department for further details.

Tecnoclean

TECNOCLEAN is a surface treatment that through a special chemical reaction fuses with the silica that is present in both glass and ceramic glazes, to create a single layer on the surface.

As a result the treated surface becomes permanently water repellent, and all other substances such as grease, dirt, calcium deposits and bacteria are washed away as the water is repelled from the surface. Microbiological analysis has shown that surface deposits of bacteria are noticeable reduced after treatment with TECNOCLEAN.

Older surfaces need to be treated by REMOV 50 GEL to remove all previous traces of calcium deposits before applying TECNOCLEAN.

Exclusive to PREFIT, TECNOCLEAN is available in a box set which contains; 125ml Tecnoclean, 125ml Remov, gloves, application sponge and instructions, or is also available in 5 litre containers.

For sales or more information please contact Prefit.

Stremler Shower Hinges

Stremler shower hinges remain the leading brand for for the UK and European market, and it is one of only a select few which carries the CE mark ensuring excellence for quality, integrity and reliability.

The Stremler range consists of many different variants such as Glass to Wall (single or double fix plate), Glass to Glass 180 and 135 degree and the new Cubica which allows a continuous seal.

All Stremler hinges come with either non or fully adjustable settings giving true flexibility for each application.

Remember this is a Premium product range however, Prefit is running a limited special nett price promotion while stocks last.
