

Fileo - Hinged Profile

FILEO

Hinged profile

FILEO

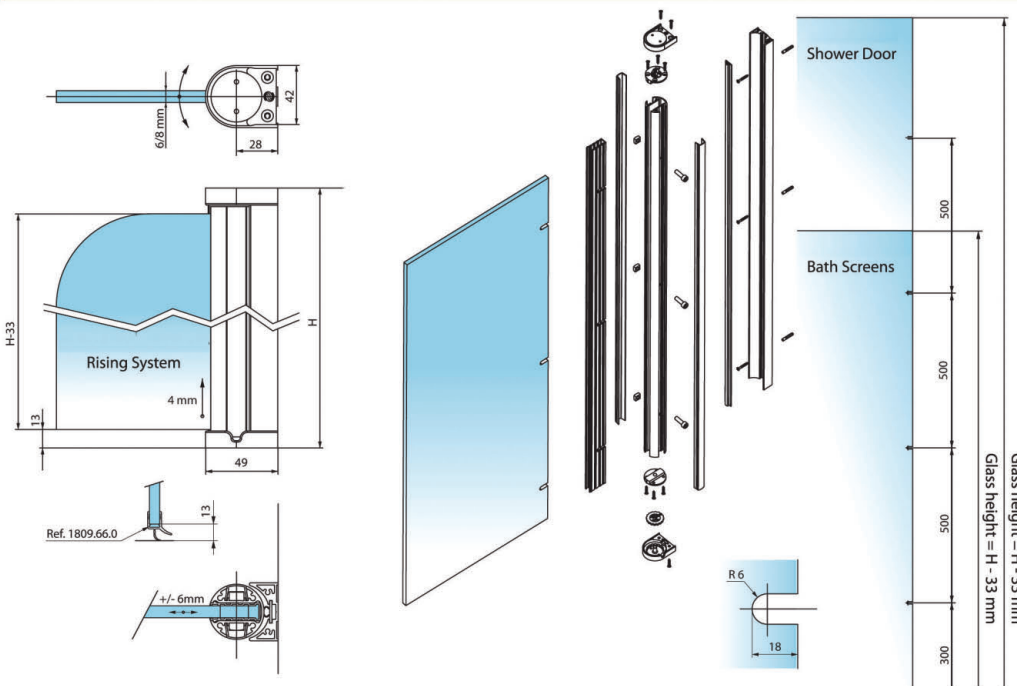

Hinged profile

This hinged profile offers a new Stremler solution for shower and bath screens. Fileo further enhances our wide range of fittings for showers.

Extremely slender and with a high quality design, FILEO combines good looks, technical prowess and user comfort. Its system with a rising cam leaves room for the lower sealing strip when the door is opened and gives an excellent compression when the door is closed. The presence of a flexible seal on the whole length of the profile reinforces waterproofing to its utmost.

It's innovative design assists when assembling on wall out of plumb and thus makes for greater ease in installation. A system preventing finger squeezing installed between the rotating profile and the support ensures safer use. Opening inside or outside.

Available in 2 finishes: Polished Aluminium or white lacquered.
